

Bargain Table on First Floor--Just Inside Entrance

Is a Special Feature that we have added to our various departments. At the Bargain Table will be conducted TWO SPECIAL SALES EACH WEEK, EVERY MONDAY AND THURSDAY, continuing three days. On such days we will give the residents of Bisbee an opportunity to secure Seasonable requirements from each of the various departments at Greatly Reduced Prices. We will put forth our best efforts in securing Merchandise that will make buying interesting at the tables. Our Initial Sale Will Be MONDAY, NOVEMBER 20th, offering the Season's Demand of LION BRAND OF SAXONY WOOL and SHEPHERD FLOSS of Superior Quality, Finish and Color.

The Season Of Knitting And Crocheting Is Here

The art is an old one which occupied the time of our mothers during the long winter evenings, preparing with willing hands little Christmas remembrances for the absent ones. It has constantly grown in popularity with the women of America. The following are suggestions for the use of these yarns: Shawls, Jackets, Scarfs, Mufflers, Wristlets, Mittens, Hoods, Tam o' Shanters, Slippers, Booties, Babys' Socks, Filigree Comforts and Slipper Soles for Knitted Slippers in all sizes on sale. Special for this sale, fine 1-oz. skeins regular 15c values Special 10c per Skein or 3 for 25c. Remember--that every Monday and Thursday you can look for Bargains at these tables.

We have only the best there is in the Hat World from \$2.50 to \$8.00.

PRACTICAL HINTS FOR POULTRY BREEDERS

Roup is a word that strikes terror to the heart of those who have a flock of fowls for which they care just as does the word diphtheria in the home. Once it gets into the flock it is hard to eradicate and many is the flock that it has devastated and ruined. It is apt to start from a common cold, to which fowls, especially young fowls, are very susceptible.

The general condition of rousy fowls is apt to vary much according to circumstances. The first symptoms are usually a droopiness and a noticeable discharge from the nostrils and from the eyes. The sick fowl may return to its food and to water, especially the latter, and it is, from the drooping of the pituitary catarrhal discharge into the drinking vessel that the disease is most commonly imparted to other members of the flock. Hence at the first sign of the disease or even suspicion of it the sick bird should be taken away from the others at once, the coop fumigated, and the drinking vessels cleaned and a diluted rousy medicine put into the drinking water for the well fowls as a preventive remedy.

The affected bird generally becomes restless and separates itself from the others, moping in corners. It will hide its head beneath its wings and draw the head close to the body, thus smearing the feathers with the discharge, gumming them together and causing them to fall. Eyes become gummed shut and in early stages the breath rattles. There is frequent coughing and sneezing also, the air passages becoming blocked. Later the disease becomes chronic and swellings and tumors form, the latter being filled with cheesy, yellow matter. The tumor removed, it is found surrounded with thick gray matter which has to be pulled away.

The disease is highly contagious and infections and the best remedies are preventive, the segregation of sick birds, fumigation, cleansing of food troughs and the giving of remedies in mild doses to the well birds before signs of the disease appear among the other members.

What is expected from the modern hen is interesting and the manner in which the flocks of today rise to the expectations is more interesting and highly remarkable. Two hundred egg birds are not now particularly uncommon and the bird that cannot yield 100 eggs in the year is considered a drone. All this is the result of breeding for eggs, year after year and generation after generation. The wild fowl in the jungle under normal conditions, will lay about nine eggs to the nest and will make

her nest two or three times in the season. That is also will at the most lay thirty eggs in the year. Compared with this the modern hen that is expected to lay more than three times as many eggs in the year or else go to the roasting pan is quite a feat with the 200 eggs per year record. Figure the weight of the egg on the average and multiply that weight by the number produced. Reduce the result that is obtained in ounces into pounds and then consider how many times her own weight in eggs Hiddy has produced in a single year. One is astounded. No longer does one wonder that vitality is lost, that the fertility of the eggs is low, that many chicks die in the shell, more still after they are hatched.

In the wild state the hen will hatch all of her eggs and, barring accidents will raise all the chicks that are hatched. Experts in the poultry world figure that if they can obtain 60 or 65 per cent of an incubation of eggs in chicks and then have 60 per cent of those that have achieved satisfactory results from the incubation. Add to this a five to ten per cent loss among grown fowls. It is an immense drain upon its resources that poultry raising has to withstand.

Good for constitutional vigor as well as egg production is the lesson.

A safe simple and satisfactory fall ration for pullets or hens for egg production is here given: 100 pounds best wheat bran, 100 pounds of yellow corn meal, 50 pounds wheat flour middlings, 5 pounds charcoal, 5 pounds salt, 100 pounds heavy ground oats, 100 pounds meat meal or meat scrap which contains a liberal supply of bone and protein and some fat, 40 pounds fine cut clover.

Mix thoroughly and feed either dry in hoppers or dampened with hot skimmed milk or hot water, or mixed with hot boiled vegetables.

Equal parts by weight of corn, oats and wheat make a good mixture to feed mornings and night.

Two parts corn, one part oats and one part barley also make a satisfactory grain mixture. The whole wheat should be fed freely at night, but sparingly in the morning. This insures more exercise on the part of the fowls during the early forenoon, better appetite for the soft food at noon and a full crop of white grain to grind out during the night. The fowls are thus given the largest amount of physical activity during both the night and day.—James E. Rice in Successful Poultry Journal.

Sorghum seeds are relished by the fowls and it would be advisable to

plant sorghum for this purpose. Feed the grain in the head and save the trouble and expense of threshing.

Do not forget that the careful observation of all the little details in poultry raising is what brings in the end, the big returns. Every neglect as a cog removed from the perfect wheel of success in poultry raising.

When the brooding season is over, separate the cocks from the hens. Where one has limited space and only a few hens it would pay to dispose of the cocks.

The old adage: "What is worth doing at all is worth doing well," fits the work in the poultry yard the same as though it were made for it. The poultryman that studies his birds and keeps a record of his breeding lines is sure to procure winners if he does as experience dictates.

Give the little chicks plenty of protein food to accelerate the growth of bones, muscles and feathers. Shorts, beef scrap, corn bread mixed with milk, etc., are good foods for this purpose.

Do not neglect the little chicks. Their growth and development depend upon the care and attention they receive when young. Give them plenty of wholesome food and see that fresh water is handy whenever it is needed.

WHY THEIR PARENTS DIED

Applicants for Life Insurance Give Some Astonishing Information in Filling Out Blanks.

Naturally applicants for life insurance may be expected to put as good a face as possible on the reports concerning relatives and the causes of their deaths, but they sometimes make rather amusing statements. Some one has collected a few of these which were originally published in the British Medical Journal:

"Mother died in infancy." "Father went to bed feeling well and the next morning woke up dead." "Grandfather died suddenly at the age of one hundred and three. Up to this time he had fair to reach a ripe old age." "Applicant does not know cause of mother's death, but states that she fully recovered from her last illness." "Applicant has never been fatally sick."

"Applicant's brother, who was an infant died when he was a mere child." "Grandfather died from gunshot wound caused by an arrow shot by an Indian." "Applicant's paternal parents died when he was a child."

"Mother's last illness was caused from chronic rheumatism, but she was cured before death." "Father died suddenly; nothing serious."—Journal of the American Medical Association

In The Churches

Lowell Chapel.

Preaching service Sunday November 19, at 10:30 a. m. and 7:30 p. m. The public is cordially invited to attend these services.

J. R. WAITE, Minister.

Presbyterian Church.

Sunday school at 9:45 a. m. with classes for all ages.

Young people's meeting at 6:30 p. m. Topic: "Missions in South America."

Preaching, by the pastor, at 11 a. m. and at 7:30 p. m.

Prayer meetings on Wednesday evening. For Sunday school workers at 7:00 p. m. For the whole church at 7:45 p. m.

Communion, with reception of members into the church at 10:30 a. m. on Thanksgiving day. The sermon will be preached by the Rev. Crichton Spencer, rector of the Episcopal church.

J. H. E. FRY, Pastor

First Baptist Church.

At the First Baptist church morning session: Sunday school at 10 o'clock. Preaching at 11 o'clock.

Evening session: Young Peoples union at 6:30. Preaching at 7:30. Subject: "The Devil with his own."

During the week: Prayer meeting Wednesday evening 7:30.

Ladies' aid Thursday 2 p. m. Refreshments at Aid meeting. You are cordially invited to worship with us.

Strangers especially welcome.

J. W. EPPERLY, Pastor.

CHRISTIAN SCIENTIST.

The Bisbee Christian Science society makes the following announcement: Sunday services at 11 a. m.

meeting at 11 a. m. and 7:30 p. m. Wednesday evening testimonial meeting at 7:45.

Reading room open Tuesdays and Fridays from 2 to 4 p. m.

All in the Fair Hall, corner Main street and Subway. The public is welcome and cordially invited to attend. The subject for Sunday, Nov. 19, will be "Soul and Body."

First Methodist Church.

Sunday school 9:45. Preaching service 11:00. Subject: "The investigation of a good conscience."

Epworth League 6:30. Preaching service 7:30. Subject: "Welshed."

Prayer meeting Wednesday 7:30 p. m. Bible Circuit. Services at Don Luis. Tuesday 7:30 p. m. Warren Friday, 7:30 p. m. The Rev. S. J. Rogers, D. D., superintendent.

cut, will preach. Owing to the missionary lecture at the Y. M. C. A. the service for South Bisbee Thursday is withdrawn.

E. G. DECKER, Pastor

St. James Episcopal Church. Sunday School 9:45 a. m. Morning prayer and sermon 11 a. m. Evening service 7:30 p. m.

Wednesday Daughters of the King meet 7:30 p. m.

Friday, Knights of King Arthur meet at 7:30 p. m.

CREIGHTON SPENCER, Rector

Syrian Peasant Superstition.

A law suit for libel brought by an apothecary in Pollau, in Syria, against a young peasant reveals an extraordinary superstition prevalent among the country people. The belief that "apothecaries and doctors have the right to kill at least one man and one woman every year in order to make medicines out of their bodies."

An accidental movement of the apothecary at Pollau, Herr Kobermann, when giving medicine to a boy named Putz led the latter to believe he was going to be killed. He ran away but got such a fright that he fell ill. The inhabitants believed his story and boycotted the apothecary, who was at length compelled to prosecute Putz. Putz was sentenced to fourteen days imprisonment, but his parents, who had spread the story, were acquitted on the ground that they had acted in good faith.

Faithful to the End.

During an exploring expedition in the arctic regions, some years ago, the men spent considerable time hunting polar bears. One day a party in an open boat saw a big bear with two cubs on the ice not far distant. As the boat drew near, the sailors threw their great lumps of walrus flesh, and these the old bear divided among her cubs, reserving only a small portion for herself. Then, while all three were feeding in a bunch, the sailors fired, instantly killing the cubs and severely wounding the dam. It actually excited pity to see her behavior. Though fatally wounded, she tore another lump of meat in pieces and laid it before the cubs. When she found they would not eat, she tried to raise them up, all the while moaning piteously. The men fired another volley, and then she fell between her cubs, and died licking their wounds.

In Praise of Poetry.

The old hymn says: "Religion never was designed to make our pleasures less," and the same thing ought to be said about poetry. The disfigure for poetry arises from the habit of treating it as if it were only a more difficult kind of prose. The prosaic commentary obscures the beauty of the text.—C. M. Crothers

Weddings Approved.

An old-fashioned man who wished to hire a team for the afternoon saw a nice pair of bays which he thought he would like to drive.

"Can't let you have them," said the liverman. "They are wedding horses."

"What's that?" asked the innocent pleasure seeker.

"Horses that won't shy at old shoes and showers of rice. Some horses seem prejudiced against matrimony. Anyhow, they lose their temper if they happen to be hit by any of the good-luck emblems that are fired after a bridal couple, and run away if they get half a chance. Every lively stable, however, keeps two or more horses who take a more cheerful view of the wedded state. Those bays are that kind. They are slated to head a wedding procession for tonight and are waiting up for the job."

Color in Precious Stones.

The color of gem stones, although of greatest importance commercially, is of little or no value in determining their particular identity. Certain stones show their characteristic shades of color, it is true, but it is only after various tests have been applied that color can be considered at all as evidence of value. All minerals in their pure state are pure white, and the color shown is due to mineral elements in many cases.

Meat and Cancer.

In view of the fact that meat, and especially fresh meat, is comparatively cheap in Australia, and in consequence its use probably very much more general than in any other country, it may be interesting on account of meat being frequently associated with cancer to note the incidence of this disease.

In 1908 the total number of deaths reported in the Commonwealth was 45,426. Of this number 2,921, or 6.29 per cent, were due to cancer. If the population is estimated at 4,500,000 the incidence would be one death per annum in every 1,540 of the population. This rate is very much lower than that of the United States. Great Britain or Germany.—Medical Record.

Another Definition.

"Politics is like marriage—and you know what the pretty widow said about marriage at the seashore." The speaker, Congressman Hardwick of Georgia, smiled and continued: "A somewhat passe summer girl, at the end of a season that had left her further off than ever from the matrimonial harbor, looked sadly seaward and said: 'Well, marriage is a lottery.' But a fair young widow, whose engagement to a millionaire of fifty-two summer had just been announced—this fair young widow with a toss of the head retorted: 'Don't you believe it. It's a game of skill.'"

FRENCH LOVE OF DRAMATIC

National Trait Illustrated by Story of Soldier Who Was Carrying the Pardon.

When Marshal MacMahon was president of the French republic, an incident occurred which aptly illustrates the French love of what is dramatic.

A French soldier sat on the summit of a hill overlooking a garrison town; his horse was picketed close by; the man was smoking leisurely, and from time to time he glanced from the expanse to a big official envelope he held in his hand.

A comrade passing by asked, "What are you doing here?"

"I am hearing the president's pardon for our friend Flichmann, who is to be shot this morning," replied the smoker, calmly, without changing his comfortable attitude.

"Well, then, you should hurry along with your pardon," admonished his comrade.

"Ah, no!" exclaimed the other, in some indignation. "See, there is hardly a soul yet on the esplanade, and the firing platoon has not even been formed. You surely would not have me rob my appearance of all dramatic effect, my friend!"

He Took It Back.

A woman, with a shrill, weak voice addressed a small crowd at Broadway and One Hundred and Tenth street on Thursday evening from a crude little platform which had been erected for the purpose. She spoke for women's suffrage, earnestly and as forcefully as her voice would permit, but the audience seemed to remain unmoved and rather inclined to make fun of the earnest talker until she spoke of Mayor Gaynor's action in refusing to interfere when the girls who did picket duty at the time of the shirtwaist makers' strike were arrested. "It was a case of no protection for women," she said, and a big man with his coat on his arm and his hat off shouted: "Good for you—they are the stuff!" Then he asked the boy who stood next to him: "Say, is this a labor meeting?" "No—a suffragette meeting—that's what it is." Then the warm man shouted once more: "I take it back," and walked down Broadway.—New York Tribune.

The Canine Howling.

There is nothing so very remarkable in the Atlantic City dog that can tell time. Every dog on earth can tell time. That is, they can tell breakfast time, dinner time and supper time, and know to a minute when it is time to start their nightly howl.

Special 50 cent Luncheon and \$1.00 Table d'Hôte Dinner daily at Copper Queen Hotel.
